Subject :- concern about growing deforestation in my area.

-----

Sir,

Through the columns of your esteemed daily, I want to express my concern about growing deforestation in my area.

Most of the trees are cut. The people who live near my locality comes to cut the trees. They cut trees without any permission. There is no plantation also. It is very bad for the environment. The results of deforestation are bad. There is an increase in temperature. The people who used to take rest under trees, they are not able to do so.

There is an imbalance in my locality. People should know the value of afforestation. The minimum 33% area should be covered by forest (plants) to maintain a proper ecological balance.

So, I will be obliged if my article finds a place in some corner of your newspaper to spread awareness.
